ABOUT MARKER

FOR OVER SEVEN DECADES
MARKER HAS STOOD FOR
INNOVATION AND SAFETY IN SKIING.

MARKER

In 1952, Hannes MARKER introduced the world's first ski binding with safety release. In the 1970s, the **M-Series** revolutionized the binding market with automatic heel release. Since 2007, MARKER has been setting new standards in the freeride and freestyle segments with innovations like the **Duke PT** and the continuous expansion of the **Royal Family**. Introducing bindings such as the **Kingpin**, the world's first pintech binding with TÜV certification according to DIN ISO 13992:2007, and the **Alpinist**, MARKER has also been making strides in the touring market since 2014. In 2022, MARKER took a pioneering step in sustainability by using eco-friendly materials like biobased and recycled plastics in the production of the **Cruise** comfort pin binding. Since 2022, MARKER has been a part of the **Elevate Outdoor Collective**.

YES, WE CARE!

How recycled and bio-based materials revolutionize our production.

6

COMP

Competing is in our genes. Challenge yourself and push boundaries with our brand new COMP bindings.

12

PERFECT MATCH BINDINGS

MARKER as the connection of all EOC ski brands providing a special edition binding of a selected ski of each brand.

22

ALPINIST FREE

Just enjoy the moment and feel FREE. Our advanced touring binding for broader skis allows for an even more beautiful descent in deep snow.

RACE

COMP 30 nG

KEY FEATURES

The Comp 30 nG is also **100%** equipped for **professional competition** in the 24/25 season. One of the most important criteria for professional athletes is **centring on the ski**. Here, MARKER's **4-linkage toe design** has proven to be extremely effective. Reliability is an absolute must, especially in extreme competitive situations. The precise centring on the ski enables quick edge changes without affecting the ski's flex behaviour. Combined with the **tried-and-tested TwinCam heel piece**, which features fantastic, **precise force transmission** and **higher elasticity**, as well as the built-in **magnesium components**, the Comp 30 nG delivers all the ski characteristics that make it the first choice for all **World Cup or FIS competitors**.

DATA

Category	Competition
Brake width	85 mm
DIN Range	15.0 - 30.0
Boot type	A
Rec. skier's weight	60+ kg
Stand height	18 mm

AFD Gliding Plate	Stainless steel
Heel	Twincam Comp
Color	black - flo - red
Weight/pc.	1380 g
Order No.	7130T1NG

COMP 20 nG

KEY FEATURES

The Comp 20 nG is also **100%** equipped for **professional competition** in the 24/25 season, here in the version with a **Z value of up to 20** for **lighter skiers**. One of the most important criteria in professional skiing is **centring on the ski**. Here, MARKER's **4-linkage toe design** has proven to be extremely effective. Reliability is an absolute must, especially in extreme competitive situations. The precise centring on the ski enables **quick edge changes** without affecting the ski's flex behaviour. Combined with the tried-and-tested **TwinCam heel piece**, which features fantastic, **precise force transmission** and **higher elasticity**, and made using the **highest quality magnesium components**, the Comp 20 provides the optimal equipment package for all **World Cup or FIS competitors**.

Order No.	7120T1NG

xCOMP 24

KEY FEATURES

The race Xcomp 24 delivers ultimate performance for **professional skiers** by using **magnesium sole holders** and a **3-point mounting pattern** of the **one body toe piece**. It brings the point of applied power closer to the boot for a **more direct feeling** when initiating turns. Two additional shock absorbers and the mounting pattern provide a **more natural and harmonic flex**. A **teflon gliding plate** provides a smoother interface between boot and binding.

DATA

COMP

PUSHING BOUNDARIES LEAVE YOUR COMFORT ZONE

Competing is in our genes. No matter if you are a **pro athlete** or a **beginner**, everyone likes a challenge. To learn and improve you need to **challenge yourself** and **push boundaries**: New skills are learnt when you are out of your comfort zone.

To leave those comfort zones and push your boundaries you need to **trust yourself** and **your material**.

PERFORMANCE

New **absorber** for improved dynamics and next level release.

AGILITY

Increased **strength** and **stiffness** plus more direct power transmission and a improved feedback.

POWER TRANSMISSION

World Cup **screw connection** on the toe and heel offers the ultimate skiing experience.

#pushingboundaries
#leaveyourcomfortzone

NEW

COMP 16

KEY FEATURES

Maximum reliability and power at the highest speed and extreme edge angles on prepared slopes: the new Comp 16 replaces the XComp 16 with a **revised TCX heel piece and adapted Comp toe piece**. All components and materials belong to the top category. The **one-part toe piece comes with magnesium components** (the current heel piece is more rigid) to withstand more pressure and delivers a more direct transmission of force to the ski thanks to a drilling pattern borrowed from the World Cup. At the same time, in the reverse direction, the **feedback is more noticeable for the skier**, making it easier for them to adapt to different slope conditions. The tried-and-tested **Z value of up to 16** enables optimum ski performance for all **ambitious piste carvers and amateur racers**.

Color	black - flo - red
Weight/pc.	1200 g
Order No.	6920Y1MS

NEW

COMP 12

KEY FEATURES

The new Comp 12 is optimally adapted for **competitive racers** who seek the greatest possible reliability and power at all speeds and edge angles on prepared slopes. It replaces the XComp 12 and joins the race with a **revised TCX heel piece and adapted Comp toe piece**. The **current heel piece is more rigid and harder** and delivers a more direct transmission of force to the ski thanks to a screw position borrowed from the World Cup. At the same time, **the feedback is more noticeable for the skier**, making it easier for them to adapt to different slope conditions.

COMP 10 TCX

KEY FEATURES

Welcome to the world of **youth racing**. The Comp 10 TCX uses the **same heel technology as in the Comp bindings**, combined with the tried-and-tested **TLT toe** pieces and all perfectly adjusted to the weight and skiing performance of **young on-piste racers**. This binding enables top skiing performance with great power transfer.

DATA

Category	Race

COMP 10

KEY FEATURES

The Comp 10 offers exactly what **racing kids** need: the right components to climb the ladder in racing competitions. The **Compact 3 heel** provides **easy step-in comfort** and great **power transmission** for **light-weight riders** and the light and sturdy **TLT-toe** handles lateral and backwards release. The binding works especially well in combination with the Jr Race interface. **Compatible with adult boot lug only.**

COMP JUNIOR 8

KEY FEATURES

Designed for **U10s and heavier U8s**. The Comp Junior 8 is perfectly adjusted for the requirements of the youngest racers with a DIN setting up to 8. Tailor-made for lightweight on-piste skiers who know how to set a good, hard edge. The **TLT toe** and **Compact 3 heel** designs deliver higher performance than the 7.0 and 4.5 bindings. Attention: **The heel fits kids' boots only!**

NEW

WC PC INTERFACE

KEY FEATURES

The Piston® Control Interface derived from Word Cup interfaces comes with an integrated **high-tech oil-hydraulic damper** which converts energy directly into speed. The skiing experience is simply stunning, because the Piston® Control System only reacts to negative rebound and shocks, the turn initiation is faster, the edge grip more direct, effortless from turn to turn. Compared to the previous version, a softer center piece has been installed, which ensures a **more homogeneous flex** over the entire length of the ski. The new hole pattern with extended mounting options ensures optimum hold and function on all ski models. The new, more stable clamps ensure improved power transmission, especially at the end of the turn. It's a perfect match with all race skis and **fully compatible** with all **MARKER Race bindings**.

ALU PRO PLATE

KEY FEATURES

The pro interface for the speed disciplines in the World Cup, designed for the **most extreme conditions** in the high-speed sector. The bearing, which is made of high-tensile high-tech aluminum for the **most direct power transmission** without any tolerance range, is not comparable with the Piston Control Interface. In the **professional race** circuit there is absolutely no alternative to the Alu Pro Plate.

FREE RIDE

DUKE PT 16

KEY FEATURES

The Duke PT 16 (DIN 6-16) is Royal Family’s **top model** and sets another milestone. It combines the superior functionality and **downhill performance of a Jester** with comfortable uphill properties of a **pin binding**. An absolute highlight is the innovative **Ride & Hike toe**. For walking mode the upper part is simply unlocked and tilted forward, uncovering the pin binding. To save swing weight the upper jaw part can be taken off and stored in the backpack. The **multi functional Lock & Walk** unit automatically locks the brakes and provides a **10° climbing aid**. For downhill mode the front jaw section is clicked back onto the base plate being quadruple secured by the **Auto Quad Lock technology**. Now the toe piece works just like an **alpine toe with all of its advantages!** The heel is the latest generation of **Interpivot 3 freeride heels** with **lightweight magnesium** housing and improved stiffness. The low height of 24 mm allows for direct power transmission and fast edge changes. Thanks to **Multinorm**, all Duke PT are compatible to **alpine, touring and GripWalk boots**.

JESTER 18 PRO

KEY FEATURES

The Jester 18 Pro delivers the **ultimate performance** for skiers who want to go big. Up front, the **Triple Pivot Elite 3 toe** piece features magnesium toe wings and an integrated Anti-Ice Rail to remove snow and ice from your boots - the horizontal spring means there is less swing weight and a shorter footprint on the ski. The **Inter Pivot 3 heel** with **magnesium** heel bracket supplements this binding's signature power transmission and makes it easier to step in, especially with today's rubber boot soles. Multi-Norm technology offers **100% compatibility** with **any boot** fitting the ISO 5355 (Alpine), ISO 9532 (Alpine Touring), and ISO 23223 (Improved Walking Sole) norms.

JESTER 16

KEY FEATURES

From its very beginning 10 years ago, the MARKER Jester has ruled the mountain. The Jester 16 continues that heritage, from the **highest peaks** and **steepest lines** all the way to the **park and pipe**. Incorporating magnesium sole holders in the toe and the even lighter magnesium **Interpivot 3 heel**. This makes for less weight, higher stiffness and improved power transmission. The Anti Ice Rail is pretty handy to scrape off the snow from the boot sole. All MARKER Royal Family bindings feature **Power Width Design** that make skis perform at their best. Due to the incorporated **Multinorm** construction the Jester 16 is compatible for GripWalk, alpine and touring boots.

GRIFFON 13

KEY FEATURES

The **lighter version** of the Jester, providing the same features for **younger** and **lighter riders**, is one of the most versatile freeride bindings on the market today, made for advanced to expert skiers. The Griffon 13 is equipped with the **Triple Pivot Elite toe** and **Inter Pivot 3 freeride heel**. Both are light and stiff and deliver improved edge grip and control. In addition, the Anti Ice Rail ensures effortless scraping off snow and ice from the boot sole. Its Multinorm technology allows to adjust the binding to accommodate either touring, GripWalk or alpine boot sole norms. On top the Griffon 13 features enhanced screws and a centralized swing weight, **ideal for spins & twists**. Griffon 13 is available with 90, 100, 110 and 120 mm brakes in 6 color combinations.

SQUIRE 11

KEY FEATURES

The Squire 11 has progressive looks and is specially designed for **lighter weight** but fully motivated **freeride** and **freestyle** rookies. A lightweight **Triple Pivot Light toe** piece features a distinctive Ice Off Rail to keep the sole free of snow and ice. A state-of-the-art **Hollow Linkage heel** with its wider boot holder reduces the step-in force by approximately 35%, even with GripWalk soles. All in all, the Squire 11 is very compact and, despite its GripWalk compatibility, only 24 mm high, which allows a very direct feel and ski control. Available in six colour combinations.

SQUIRE 10

KEY FEATURES

The perfect choice for **newcomers to freeriding and freestyle**. A very light **Triple Pivot Light toe** piece ensures direct and easy power transmission in every skiing situation. The matching, proven **Compact 3 heel** offers excellent release characteristics with a very low step-in force. Getting started on **park and pipe** is even more fun with the latest Royal Family design, an **attractive price** and a freeride brake perfectly designed for the purpose.

KINGPIN M-WERKS 12

KEY FEATURES

MARKER's **state-of-the-art** performance pin binding with DIN settings of up to 12. The Kingpin M-Werks 12 has a **carbon-reinforced heel** and weighs just **655 g** including brake. It offers the **ultimate** in uphill and downhill performance thanks to features such as an **XXL power transmitter** and ergonomically shaped climbing aid. A very stiff, similarly carbon-reinforced front with an **ISI toe** piece makes the binding easier to step into, as a wide footprint with integrated stop automatically positions and aligns your boot. Kinematically optimised pin levers then allow the pins to snap shut with just a gentle push.

KINGPIN 13

KEY FEATURES

The legendary Kingpin combines the **lightweight ISI pin toe** piece with an **alpine heel** piece including 0°/7°/13° climbing aid. This makes it very easy to walk on any terrain and ensures great descents with **outstanding performance** and top-level release functionality. The binding is therefore perfect for ambitious **backcountry** and **freeride touring** enthusiasts. A very stiff, carbon-reinforced front with an ISI toe piece makes the binding easier to step into, as a wide footprint with integrated stop automatically positions and aligns your boot. Kinematically optimised pin levers then allow the pins to snap shut with just a gentle push. The wide hole pattern and XXL power transmitters deliver the **ultimate** in **direct power transmission** for the utmost control and fun on the descent.

With all the advantages of the **Alpinist product family**.

#freeyourmind

NEW

ALPINIST FREE 13

KEY FEATURES

The **new Alpinist Free** with a Z value of **6.0 to 13.0** weighs just **395 g** including the brake and delivers **noticeably improved force transmission** and **ski performance** thanks to the **new wider base** area. This means the pin binding is the first choice when every gram counts on long ascents followed by unforgettable **freeride descents**. Like the predecessor model, in addition to the Alpinist heel piece, it is equipped with the extra rigid, carbon-reinforced **ISI toe** piece, whose **wider platform** enables simplified and intuitive step-in. The clever kinematics of the pin lever allow the pins to be snapped in with very little force. The Alpinist's heel piece offers a full 35 mm adjustment range as well as 0°, 5°, and 9° climbing aids. The wide drilling pattern of the Alpinist Free also supports the very good transmission of force to the edges and the overall design allows active length compensation, which does not affect the ski's flex behaviour. The Alpinist Free is made from **sustainable materials** such as **recycled** or **bio-based plastic**.

ALPINIST JR LONGTRAVEL

KEY FEATURES

The Alpinist Junior Long Travel combines **maximum performance** with **minimum effort**. If you want to get serious about touring, you can't get around a **pin binding**. The Alpinist JR is designed for a skier's weight up to about 65 kg, **for children and young people** who regularly go to the mountain and need **optimal performance**. The DIN range is adjusted with **2 - 6** for the young tourer. The heel adjustment range of **35 mm** (-7.5 / +27.5mm) also allows the binding to **grow over a wide range**. Three walking modes (0°, 7° and 12°) offer the best ascent comfort in any terrain. Basically, the Alpinist JR has all the features of its „big“ siblings. However, thanks to the **Junior U-Bow**, young skiers also benefit from the reduced entry forces and the low weight of only 360 g (with brake) per binding, which is mainly thanks to the extra-light fiberglass-reinforced climbing aids. The Alpinist JR Long Travel is delivered with a 90 mm brake.

CRUISE 12

KEY FEATURES

We think about tomorrow! The Cruise is mostly made from **bio-based** and **recycled plastics**, without compromising on quality and performance. This reduces waste and carbon emissions compared to the conventional manufacturing process.

And when it comes to skiing qualities: Keep it **easy** for maximum **fun**! The MARKER Cruise weighing just **475 g** per binding (including brakes) allows an **incredibly simple, comfortable**, and modern entry into the world of ski touring. The pin binding comes with a number of outstanding features that make life easier for **touring newcomers**. The **ISI toe** piece and heel piece noticeably **reduce the effort** required to **step in**. The heel is particularly easy to operate and features a color-coded climbing aid for comfortable climbing at 0°, 8°, and 12°. The ergonomic design allows the heel piece to be **rotated easily** through **180°** while the brake is automatically locked. This makes switching from hike mode to ski mode and back again quick and easy. The independent adjustment of vertical and horizontal release also further **reduces the risk of false release** during descent.

F12 TOUR EPF

KEY FEATURES

MARKER's F12 Tour EPF is ideal for skiers who want to **cross over** from **alpine touring** to **resort skiing** on occasion. EPF (Extended Power Frame) features a **super wide connection** to the ski, maximizing power transmission and enhancing the **downhill skiing** ability of this **exceptional uphill** climbing product. On top it makes turn initiation easier in any snow conditions.

F10 TOUR

KEY FEATURES

MARKER's F10 Tour is an ideal **entry level touring** binding that can offer years of **great performance**. Focusing on producing the right binding for the end user is MARKER's DNA. For the skier who wants a very light **all-day touring setup** with solid **all-mountain performance**, the Tour 10 features a DIN range of 3-10, making it a great choice for **lighter weight skiers**. Compatible with alpine and touring boots, thanks to **Multinorm!** The climbing aid works with 0°, 7° and 13° for relaxed uphill climbing in any angle.

F5 JR TOUR

KEY FEATURES

The F5 JR Tour with a DIN range from 1.5 to 5 is a binding for all occasions and every adventure. Whether on the **slopes** or **climbing** to the next peak – nothing stands in the way of the perfect ski day. The **frame binding** offers all the **touring features** for ascents, such as the 0°, 7°, and 13° climbing aid, but also delivers optimal transmission of energy and performance on the downhill run due to the frame weighing only 890 g. So it is ideal for every ski day. The toe piece and base plate are compatible with **all common boot models**, whether **children's** or **adult boots**, alpine or touring boots. GripWalk soles also fit into the F5 JR Tour, which complies with every ISO standard. The sole length can be adjusted from 235 to 300 mm, so the binding **can grow** with the child for a few seasons.

NEW

COMP 16 GW

KEY FEATURES

The **high-performance** binding for ambitious **on-piste skiers** is now also suitable for **GripWalk** soles. This enables the greatest possible walking comfort, **easy step-in**, and excellent grip in the binding. The Comp 16 GW black is manufactured exclusively with the **highest quality** components. The **one-part Comp toe** piece features magnesium components as well as error-forgiving absorbers underneath. The Comp absorber reliably absorbs short, hard shocks and permanently centres the ski boot in the binding.

NEW

COMP 12 GW

KEY FEATURES

The Comp 12 GW black is now also suitable for boots with **GripWalk** soles. It has the same **high-quality** design as all Comp models and includes DIN values from 4.0 to 12.0. The **one-part screw** connection of the toe piece by means of a 3-point hole pattern results in an **extremely direct force transmission**, which is not diminished by the absorbers underneath providing error-forgiving characteristics. The Comp absorber absorbs short, hard shocks and always keeps the ski boot optimally centred in the binding.

GRIFFON 13 D

KEY FEATURES

The **lighter version** of the **Jester**, providing the same features for **younger** and **lighter riders**, is one of the most versatile **freeride** bindings on the market today, made for advanced to expert skiers. The Griffon 13 D is equipped with all **Triple Pivot Elite toe** and **Inter Pivot 3 freeride heel**. Both are lighter and stiffer than previous parts and deliver improved edge grip and control and easy entry. The Anti Ice Rail makes it easy to scrape off snow and ice from the sole. Due to the **FDT technology**, another important feature for the rental business is the **toolless length adjustment** of toe and heel. Griffon 13 D is available with 90, 100 and 110mm brakes.

NEW

GRIFFON 13 TCX D

KEY FEATURES

The proven **demo version** of the Griffon 13 with TCX heel for a more **alpine-oriented** target group. It combines a more comfortable entry with very skiing riding performance. Made for advanced to expert skiers. The Griffon is equipped with the **Triple Pivot Elite toe**, **TCX heel** and the Anti Ice Rail to scrape off snow from the boot sole. Due to the **FDT technology**, another important feature for the rental business is the **toolless length adjustment** of toe and heel. Griffon 13 TCX D is available with 90, 100 and 110mm brakes.

SQUIRE 11 TCX D

KEY FEATURES

The **Squire 11 TCX Demo** is designed for **intermediate** and **lighter weight advanced freeride/freestyle** skiers looking for great power transmission and a compact, robust construction. Especially the very light, optimized Triple Pivot Light toe piece, equipped with a distinctive Ice Off Rail, immediately catches the eye. The proven TCX heel is easy to use and requires only low entry forces. Thanks to the **FDT technology**, the **tool-less length adjustment** of heel and toe makes life very easy for all rental businesses.

ALPINIST DEMO 10

KEY FEATURES

Super-light **pin binding** designed for **rentals** and featuring a comfortable ISI toe piece, **pre-mounted** brake and an adjustment range for sole lengths from **253 to 359 mm**. It sits on a weight-optimised plate with a scratch-proof scale and can be **adjusted without tools**, simply by pressing a lever. The boot is automatically positioned and aligned on the wide footprint with integrated stop. Kinematically optimised pin levers allow the pins to snap shut with just a gentle push. Like the other Alpinists, the Demo features active length compensation in the ski flex area and impressive power transmission during descents thanks to a 38 mm wide hole pattern. The heel features 0°, 5° and 9° climbing aids and can be switched quickly and easily between ascent and descent mode.

NEW

CRUISE 10 DEMO

KEY FEATURES

The Cruise 10, which was successfully launched last year, is now also **available as a rental** binding. This makes it easy to enter the world of ski touring and – thanks to the ISI toe piece – simplifies pin binding step-in even further. With two color-coded climbing aids, the **easy-to-use heel** piece ensures comfortable climbing at 0°, 8°, and 12° on virtually any slope. The ergonomic design allows the heel piece to be rotated 180° for a **comfortable, automatic brake** lock. This makes switching from walking to skiing mode and back extremely easy. Occasional tourers also benefit from the independent adjustment of vertical and horizontal release, as this significantly reduces the risk of false release, especially during descent. We think about tomorrow! Without compromising on quality and performance, the Cruise 10 Demo is largely made of **bio-based** and **recycled plastic fibres**. This reduces waste and carbon emissions compared to the conventional manufacturing process.

FDT TPX 12

KEY FEATURES

FDT is the innovative and super convenient binding system by MARKER. 3 different plate versions (plate, high performance, junior) feature an angled scale with **integrated bar code**, easy DIN-setting and **good visibility** of contact pressure.

Mounted on the FDT plate the 12.0 TPX all-mountain binding is suited for **advanced to expert skiers** looking for a combination of high performance, comfort, and **GripWalk** compatibility. The Triple Pivot X toe offers great power transmission, upward release function, and low swing weight, while the TCX Light heel contributes to comfort with the easy step in afforded by TwinCam technology.

POLARIZED

+ Reduced glare from snow

+ Greater contrast when sunny

CUSTOM SPECTRUM

+ Filters light Specific for Action Snow-sports

+ More contrast between white, blue, and grey tones

ADAPTIVE LENS

+ Photochromatic – automatically adapts to surrounding sun light intensity

+ Available in standard and HD polarized versions

These lenses darken when exposed to light of sufficiently high UV intensity, generally only emitted by the sun, and become clear again in its absence.

LOW PROFILE

+ Minimal Weight

+ Minimal Bulk

+ Easy to stash

This category of goggle forgos the bulky plastic frame, and instead has the face foam connected directly to the dual-lens. This is made possible thanks to advancements in goggle Anti-Fogging technology. The benefits of flexible, comfortable fit along with panoramic vision it provides are unparalleled.

W016V1T	Instal. Tool; World Cup plate; Junior Race Pivot & short	61 - 117 mm
W005S1T	Instal. Tool; ALU PRO plate	61 - 117 mm
W007H1T	Instal. Tool; 7.0, 4.5 + Jr. RTL	
W017V1T	Instal. Tool; Griffon & Squire D, FDT & FDT Junior	61 - 117 mm
W020X1T	Instal. Tool; Kingpin & Alpinist & Cruise	70 - 126 mm
W014U1T	Instal. Tool; Duke PT	70 - 126 mm
W015V1T	Instal. Tool; PIN Demo	70 - 126 mm
W018X1T	Instal. Tool; JR Tour	61 - 117 mm
W019X1T	Instal. Tool; RMotion3 plate	61 - 117 mm

DEMOBOARD

CLIMBING AIDS

CRUISE
Thanks to the climbing aids, walking uphill is comfortable. They can be operated quickly and easily in any situation thanks to their design with the pole baskets. The color-coded heel lifts enable three climb modes (0°, 8° and 12°).

KINGPIN
The titanal ascent aid, conveniently adjustable via ski pole, can be locked in two positions at 7° and 13°. Integrated elastomer damping elements make ascending more pleasant, simply because the irritating „clacking noise“ is eliminated.

ALPINIST
Neutral walk mode and two climb modes with 5° and 9°. The fast adjustment mode allows quick switching between 0° and 9° without having to turn the heel.

FRAME TOUR
The titanal ascent aid, conveniently adjustable via ski pole, can be locked in two positions at 7° and 13°. Integrated elastomer damping elements make ascending more pleasant, simply because the irritating „clacking noise“ is eliminated.

ACTIVE LENGTH COMPENSTATION

CRUISE
Active length compensation in the heel allowing the heel to move back up to 7mm when the ski is flexed.

ALPINIST
Active length compensation at the heel, so that the heel can move back up to 4 mm when the ski is flexed.

LENGTH ADJUSTMENT

CRUISE
The Cruise heel offers a 25mm heel adjustment range (+- 12.5mm).

ALPINIST
The Alpinist heel offers a heel adjustment range of 15 mm (from 7.5 mm to +7.5 mm).

ALPINIST LONG TRAVEL
The Alpinist long travel heel offers a heel adjustment range of 35 mm (from -7,5 mm to +27,5 mm).

KINGPIN
The Kingpin heel offers a heel adjustment range of 25 mm (from -10 mm to +15 mm).

BRAKE

ALPINIST / ALPINIST LONG TRAVEL
Optional brake for MARKER ALPINIST models. Improved usability on both brakes.

CRUISE
The brake locks automatically as soon as the ski boot is placed on the brake. The brake releases automatically when rotating the heel 180°.

LOCK & WALK
The multi functional Lock & Walk unit automatically locks the brakes and provides a 10° climbing aid.

HEEL

CRUISE
The ergonomically designed heel section ensures a simplified and as effortless change from ski to walk mode as possible by just rotating the heal by 180°.

ALPINIST
Alpinist heel with adjustable lateral release with various DIN options and 15mm heel adjustment range (+-7.5mm). Offers three walking modes thanks to the hot forged aluminum climbing aid. The „Fast Shift Mode“ allows quick switching between neutral and maximum climbing aid. The active length compensation in the heel allows constant power transmission and release performance, even when the ski is flexed.

KINGPIN
The revolutionary heel construction for PinTech bindings with widely spaced sole contact points provides loss-free and very direct power transmission, as is normally only known from alpine bindings. Also in terms of safety, the Kingpin offers until now unknown advantages.

HOLLOW LINKAGE 2
The latest generation of Hollow Linkage heel Improved step-in performance: 30% reduction in step-in force and easier step-in with GripWalk soles

INTER PIVOT 3
The latest generation with magnesium body for excellent downhill performance in the style of the Royal Family. Z-value 6-16. The third and latest generation completely renewed: improved power transmission, energy absorption and vertical heel elasticity combined with improved comfort.

COMPACT 3
Tha latest generation of MAREKRs Compact heel. A statement of efficiency - with the usual optimized MARKER release properties and the perfect mix of great design, lightness and excellent functionality. This heel technology is perfect for beginners and occasional skiers due to improved release properties and is an excellent value.

TWIN CAM X (TCX)
The next logical step in the improvement of our Twincam heel, with more power, higher elasticity in the release and an optimized performance curve. The construction increases the boot and ski connectivity for a longer period, even in extremely steep terrain, ensuring more precise ski guidance until released. It also offers improved power transfer through the wider connection of the heel rail (43 mm).

TOE

ISI TOE
Dieser ISI Vorderbacken sorgt für ein möglichst einfaches und schnelles Einsteigen, welches durch die folgenden Features gewährleistet wird:
Rubber stop pad: Fixes the toe of the shoe during entry
Wider entry platform: Widened sole reception at entry
Easier entry: The shoe locks into the binding with significantly less effort

TRIPLE PIVOT LIGHT 2
The latest generation of Triple Pivot Light 2 toe is not only lighter, but also got the practical and solid Anti Ice Rail, which allows you to scrape snow and ice from the sole. The toe is GripWalk-ready, so it fits conventional alpine as well as modern GripWalk soles.

TRIPLE PIVOT ELITE 3
The toe construction with DIN/ISO 8.0 - 18.0 allows impressive holding forces in freeriding. The spring in the toe is mounted transversely, the 5 ° inclined sole holder provides maximum energy absorption to reduce false releases. The large contact surface optimizes power transmission and allows the greatest stresses. Front jaws with this technology thus achieve unprecedented performance in relation to their weight.

RIDE & HIKE
For excellent downhill performance in the style of the Royal Family and release function together with pin technology for the perfect ascent; Z value 6 - 16. Removable toe piece: saves 300g per foot on the ascent.

X-COMP
Using the Xcell piston technology with additional modifications in shock absorbance and reduced stiffness, enable the ski a more natural and harmonic flex, as well as a more smooth and "forgiving" performance. The combination of the Xcell damping technology, with the athlete based modifications in stiffness and shock absorbance, provide a totally new racing performance that combines the best of old and new.

TLT (2LINKAGE) TOE
The next level of improvement for the tried-and-tested two linkage toe system. Light, robust, full side and rear release with improved DIN range. The release springs, triggered by the sole bracket, uses the clever TLT system to provide rear release without taking up extra space or adding extra weight.

CRAMPON

Easy to mount crampons for KINGPIN, Alpinist and CRUISE available in sizes 80 mm, 90 mm, 105 mm, 120 mm.

MATERIALS

BIO-BASED PLASTICS
Bio-based plastics are used in components with maximum mechanical load. They have the same mechanical properties as conventional plastics, have a lower CO2 footprint and do not consume fossil resources such as oil or natural gas. The bio-based plastics are used, for example, for the climbing aids and the toe.

RECYCLED MATERIALS
Recycled plastics have the best environmental footprint and reduce waste at the same time. To meet our high quality and safety standards, we have pursued a consistent Design for Sustainability approach. The material is used for components under less stress, and the component geometries have been specially designed for the properties of recycled plastic.

MAGNESIUM PARTS
As THE lightest and most robust metallic construction material, magnesium is perfectly suited for our high-end products. This means you are equipped for even faster runs and the most radical lines!

EPF - EXTENDED POWER RAME

The power booster! The extra-wide and exclusively for the Duke EPF developed Power Frame offers breathtaking power transmission and driving performance in all conditions. Recommended for ski widths over 88 mm.

MULTINORM (MN)

Height-adjustable gliding plate to be compatible with all boot soles on the market; Compatible with: Alpine (ISO 5355 A), Touring (ISO 9523) and GripWalk (ISO 23223 A) soles; Easy to adjust: Pozi screw at the front to adjust height of gliding plate

GRIPWALK

The sole-binding system for better walking comfort and top skiing performance. GripWalk contains of a new co-polymer sole with rocker profile. The convex shape and ribbed tread of the rubber add a lot of walking comfort and provide a much better grip. Still, integrated pads made of stiff and rigid materials, enable great power transmission and more precise release function of the binding. GripWalk soles are the perfect tuning parts designed for selected premium ski boots and bindings.

GLIDING AFD

MARKER bindings are equipped with a moveable AFD (anti friction device) supporting a precise release almost entirely unhindered by dirt, snow and ice! Individual adjustment of the AFD to the area of application enhance optimized functionality - for racing, for children's bindings or on ski tours.

ANTI ICE RAIL

The metal rail helps to scrape ice and snow from the sole of the shoe.

AUTO QUAD LOCK

Front jaws lock automatically at four different points when entering the binding.
