OUR PURPOSE
**FOR THE
MOUNTAINS**

PRODUCTS

We build for the mountains - all seasons, all terrains. Our purpose and know-how drives innovation, and our innovation drives market solutions and performance.

PLAYGROUNDS

Rossignol is from the mountains. It's where we live, where we work, where we play. The mountain gives us inspiration, and is why we rise.

PLANET

Our obligation is to preserve the integrity of the mountains and in turn, the ecosystem of our planet, for generations to come.

**AND
A MOUNTAIN
FOR ALL**

ACCESS

Rossignol equips the first mountain experience for many skiers. We want to inspire more first times on the mountain, across regions, cultures and disciplines.

DIVERSITY & INCLUSION

Across every aspect of identity, we want more people to have more turns and greater representation so they can find a sense of belonging on the mountain, especially communities left behind.

SKIS

WHAT'S NEW?

NOVA
CARVE CONFIDENTLY

Women seeking an elegant on-piste ski that inspires confidence and fun at every turn will find the perfect companion in Nova with skis adapted to every level, from beginner to expert.

HERO ELITE
CALLING ALL HEROES

A condensing of the racing service expertise to feel the power in every turn. Best racing technology at the service of all.

EXPERIENCE
ALL RESORT

The Experience range has been designed to enhance your skills and erase your doubts to more effectively tackle any slope, with absolute composure. A ski combining strength and control to allow you to enjoy even more exceptional moments in resorts!

SENDER SOUL 102
FREE YOUR WAY

The Freeride solution for versatile abilities and surfy mood. The one Freeride ski fits all from the wild open spaces to tiny forest runs with Freetouring options in mind. This ski is also remarkable when snow conditions becomes harder or chunky

OUR TECHNOLOGIES

At Rossignol, for over 100 years, technology has been at the heart of how we make skis. While they look simple on the outside, we've learned an awful lot over the last century about how to tweak the inside and make skis stand apart. Deep R&D is core to who we are, and is one of the biggest benefits you get when you choose Rossignol. As of this year, there are four key transversal technologies now forming the bedrock of our performance.

Each has its own application, but at least one of these cutting-edge technologies is now backing any Rossignol experience you sign up for.

4 ROCKERS

FULL CAMBER
Race power control

TIP ROCKER
Hard snow precision

TIP & TAIL ROCKER
Versatility, adaptability

TWIN ROCKER
Smear & grip

3 SIDECUTS

OVERSIZED SIDECUT
Carving power

EXTENDED SIDECUT
Fluid, evolutive carving

PROGRESSIVE SIDECUT
Playfull fluidity

4 KEY TECHNOLOGIES

V-PROFILE

V-Profile isolates the layered components of the ski core to allow fine tuning of the flex pattern, optimizing grip and precision in every kind of turn.

DYNAMIC FLEX AND GRIP IMPROVEMENT

LCT

Line Control Technology (LCT) adds a central power rail to the middle of the wood core to eliminate counter-bending, allowing you to direct the ski's energy towards steering, no matter the condition.

PERFECT STABILITY AND FULL CARVE PRECISION

V-A-S

Vibration Absorber System (VAS) dampens chatter for smooth snow contact, delivering confidence and control in all variable snow conditions.

VIBRATIONS ABSORPTION AND CONFIDENT CONTROL

AIR TIP

Air Tip reduces swing weight at the ski's extremity, making it more maneuverable and playful, while maintaining a strong platform under foot.

INCREASE FLOTATION, EFFORTLESS MANEUVERABILITY

HERO ATHLETE

FORZA

LICENSE TO CARVE

ULTIMATE CARVING

When the corduroy calls, FORZA answers. Unlock a world of maximum angulation and let the traditional limits of piste skiing fade behind you.

FORZA is carving in its purest form: maximum angulation and no speed limits. Its short turn radius, longer length, and wider tip amplify stability to let you drop your hip and accelerate like a World Cup racer. FORZA is piste skiing reborn.

Unlock a world of maximum angulation and let the traditional limits of piste skiing fade behind you.

- Carving experience revolution
- High performance skiing
- Maximum angles
- Aggressive sidecut
- Bigger skis for short turn.

SENDER

FREE YOUR WAY

DO IT ALL FREERIDE

The Freeride solution for versatile abilities and surfy mood. The one Freeride ski fits all from the wild open spaces to tiny forest runs with Freetouring options in mind. This ski is also remarkable when snow conditions becomes harder or chunky.

It's power through chunder, float over powder, and hold underfoot. It's life without constraints—one ski to rule them all. The Sender Range. An athlete-driven, legacy-infused big mountain slayer to free your wildest ambitions. Whether you're skiing frontside chalk, backside blower, or lapping the untouched backcountry, discover a world where nothing's out of bounds. Rossignol's 100-year mission to expand skiing's boundaries lives on in this ski, so you can thrive in the terrain that drives you.

ESCAPER

CALLING ALL OUT

MANEUVRABILITY AND LIGHTNESS

Ultimate lightness with no compromise on downhill.

It could be a morning before work or an evening at sunset, guided simply by the light of a head torch. A night in a mountain hut or a van. A day trip on trails with just trainers or skis on your feet. An invitation to discover new horizons.

- Dedicated tip for skin anchor

SKINS

COMPOSITION

100% NYLON

Lightweight, a thin design and long life span. Still with quality standards, the 100% Nylon skin opens the door to backcountry exploration.

MIX (70% MOHAIR / 30% NYLON)

The classic skin mix, now lighter and with a thinner design. The skin for all enthusiastic skiers.

EVER DRY 3.0

EVER DRY 3.0 represents a step forward for the environment: it is the first fluorine-free treatment for skins.

GRIP

Good grip on ascents is very important. A combination of materials and fibre attachment systems make skins very stable in all conditions and throughout their entire life span.

SSL

Thinner layers make the SAFER SKI LIGHT (SSL) membrane 12% lighter, i.e. 150g/m². SSL reduces the weight of a pair of skins by around 60 to 75g while maintaining 100% watertightness.

ARCADE

100 % EVERYWHERE

The Rossignol Arcade skis redefine the all-mountain category with a personality that can literally ski 100% anywhere. The combination of a shorter turn radius with a rockered tip and tail profile makes for progressive carving in all terrain.

ARCADE is made for the snow you will find, not for the snow you are expecting to find.

ESSENTIAL

BE THE CHANGE, BE *essential*

Essential, the result of a collaborative effort...

Designers, material engineers, production technicians and recycling specialists work tirelessly, hand in hand, to achieve ambitious goals and meet the challenges of design, manufacturing and marketing. From this collaborative, the Essential ski was born, a unique new Rossignol model, ecodesigned with its complete life cycle developed in a circular economy.

... Which brings together all our communities in our global and open vision of outdoor activities

Because with Essential ski we have the power to act, we invite all mountain lovers to get more involved at their own level. Because when everyone contributes with their means, and cooperation is the rule, then everything becomes possible!

ECO-CONCEPTION

Recycled, Certified & Bio sourced materials represent 73% of the ski.

34%
Recycled materials

39%
Bio Sourced materials
32,7%
of which is beech wood from responsible forests

The ski is recyclable at 77%, 7 times more than a traditional ski.

35% ALUMINIUM
Recycled in organized facilities, aluminum is infinitely recyclable today.

35% WOOD
Wood chips are reused in various construction materials. We are actively working on solutions that will allow these to be reused in future Rossignol skis.

7% STEEL
Recycled in organized facilities, steel is infinitely recyclable today.

12% PLASTIC
Sorted, recovered, and repurposed as a source of energy. We work actively with the recycling sector.

5% FINE WOOD
Sorted, recovered, and repurposed as a source of energy. We work actively with the recycling sector.

6% WASTE
Throughout the different stages of grinding and sorting ski materials, only 6% goes towards waste.

SKIBOOTS

The 2425 ski boot collection exudes **innovation** from every pore, as reflected in a new boot featuring **a totally groundbreaking design inspired by a daring vision**. VIZION epitomises the ski boot of tomorrow's world.

- This high-performance ski boot is so simple to slip on. This sporty four-buckle ski boot ensures easy foot entry to deliver a new premium experience that is infinitely less restrictive.
- Two new Race boots have also been developed - one with expert feedback from our World Cup athletes and the other designed for a wider public.
- When it comes to design, the HI-SPEED and PURE ranges have also been given a complete makeover.

STEP INTO A REVOLUTION

VIZION

THE GAME CHANGER

VIZION

How can we elevate the experience for skiers when using their ski boots while streamlining the purchasing process? These questions were the driving force behind the development of this new ski boot.

The main trends in consumers' expectations reveal that major changes are sweeping the sports sector. Focusing on accessibility to ramp up the user experience and improve performance is key.

The electric bike market has grown under these new consumers with their desire to ride further and longer, and experience new sensations offering greater intensity. Padel is an extremely fun and accessible sport that allows more people to play against each other on the court. Classic Nordic skis with skins revolutionised the market when they hit the scene, since everyone could effortlessly ski and up their game without having to wax.

Whatever the sport, equipment needs to be more accessible, and ski boots are obviously no exception. All skiers should be able to easily slip on their boots without any trade-off in performance.

The target consumer market is vast and encompasses all those skiers who want great performance, whatever their level, with no strings attached. These skiers are looking to make their life easier when it comes to slipping on their four-buckle ski boots.

The result is VIZION, **a ski boot with all the attributes of a high-performance four-buckle boot, but offering incredibly easy foot entry.**

A real reason to change your boots.

THE GAME CHANGER.

STEP IN TECHNOLOGY

VIZION isn't magic - it's technology! Innovation was the key to this project, and no fewer than four patents covering the structure, the mechanism and the liner were registered during the design process.

1 SHELL STRUCTURE

The shell is modelled on a traditional overlap structure and is wide open at the rear to ensure easy foot entry. An articulated highback recreates the last of a traditional four-buckle boot.

2 BI-INJECTED HIGHBACK

The highback is bi-injected with a:

- Highly rigid material in the centre to provide solid rear support
- Soft material along the sides to mould to the shape of the shell and offer a snug foot wrap

3 STEEL SPINE

PATENT PENDING

This rugged, articulated steel spine reinforces the action of the highback and acts as an anchor point for the cuff release mechanism. This anchor is located at the top of the spine.

- Highly solid rear support
- Powerful flex
- More energy.

4 DUAL CORE VIZION

The Dual Core technology incorporated into the VIZION boots is used on the lower part of the shell with an injection point. The shell's reinforced torsional and flexural rigidity improves performance.

5 DOUBLE BUCKLE

PATENT PENDING

This double buckle provides two independent functions:

- Unlock the cuff through a cable with its inner section
- Traditional closure with the upper section

When the release buckle is opened, the cuff unlocks. When closing, the cuff returns to the ski position after flexing.

- Very intuitive and easy to use
- Automatic
- The cuff can be adjusted without having to switch over to foot entry mode.

7 GENERATIVE DESIGN

The generative design saves weight by optimising the thickness of the plastic and is mainly located under the buckles to prevent the shell from deforming during closure.

8 SEAMLESS TOE BOX

This seamless, one-piece toe box construction provides excellent comfort around the toes. It also improves thermal insulation by retaining the heat inside the liner.

6 STEP IN LINER FULL CUSTOM

PATENT PENDING

A traditional liner construction with the ability to follow the cuff when it tilts towards the rear.

- Elasticated areas to allow the liner to follow the cuff
- The liner can easily be removed and refitted

The fit is the same as a four-buckle boot, with excellent heel support, and can be fully personalised using the Configuration machine.

9 INTERNAL LASTS

The range offers three internal lasts:

98 mm LV

HERO

CALLING ALL HEROES

A new design and shape for the WORLD CUP Z SERIES and HERO WORLD CUP ranges. The HERO World Cup boot harnesses all the experience of top-level competition and is technologically close to the Z Series.

ENGINEERED FOR RACING

Designing a new Race boot is always a tremendous challenge, so athletes play a leading role in the development process. Since the 2022/23 season, Petra Vholva and Loic Meillard have achieved great success in skiing with this new boot. Our other athletes - Zan Kranjec, Laurence St Germain, Alexander Cameron and the talented young Zrinka Ljutic - will no doubt be wearing them on the World Cup podiums during the 2023/24 season.

PETRA VLHOVA (SVK)

ZAN KRANJEC (SVN)

LOÏC MEILLARD (SUI)

ZRINKA LJUTIC (CRO)

OUR ATHLETES AT WORK

We make a point of involving our athletes when working on the boot's look to ensure that the graphic design ticks all their boxes. We are keeping the grey colour as a symbol of performance, aggression, power and speed.

TECHNOLOGIES

NEW GEOMETRIC SHAPE

97 mm last:
 - The internal last is closer to the foot at the instep. The angle is near 45° by moving back 1.5 mm, and lowering by 1 mm on the top of the foot.
 - The heel pocket is deeper to ensure better support
 - The sole length is reduced by 3 mm to 303 mm (for size 26.5)
 This improves precision, power transfer and foot interaction.

NEW SHELL STRUCTURE

The walls of the shell are thicker to bring them closer to those of the Z Series.
 The lower part of the shell has been strengthened, and the new design delivers greater torsional rigidity.

NEW CUFF STRUCTURE

The top of the cuff has been redesigned with thicker walls. The axis of rotation is the same as the Z Series.
 The rear area has been reinforced to increase rear support and enhance the rebound.

POWER FLEX INSERT

This insert creates a strong link between the shell and cuff in this hinge area for improved power transfer.
 Two options are available for adjusting the flex according to the skier's morphology and proficiency level, or the temperature and snow conditions.
 - Carbon insert (pre-mounted): extremely hard
 - 53 SHD PU insert (in the box): soft.

DUAL CORE RACE

The entire HERO WORLD CUP and HERO range features the DUAL CORE technology.
 The process involves three injection points on the shell and two on the cuff. This technology can be used to accurately finetune the progressive flex, rear support and rebound. It also allows for highly effective lateral power transfer.

CANTING RACE

The canting is the same as for the Z series.
 - External canting (pre-mounted): 0.5°
 - External canting (in the box): 1°
 - Fixed internal canting.

VIBRAM LIFTER

OPTIONAL - for making the HERO boots more comfortable to walk in - 3 mm Vibram

HI-SPEED

The HI-SPEED piste range has undergone a technical redesign this season with new liners to raise the performance bar, as well as an aesthetic revamp with a new range of colours.

It comes in three internal lasts of 98, 100 and 102 mm. Configuration is the key concept for ensuring that these boots are perfectly tailored to each skier, whether for supercharging performance and/or improving comfort.

All the black models incorporate between 20% and 30% recycled plastic materials, depending on whether it is the shell or cuff.

TECHNOLOGIES

STRUCTURE

GENERATIVE DESIGN STRUCTURE

Generative design is unique to Rossignol. It's part of the brand's DNA. This structure allows us to optimise material thicknesses: more rigid on the lower part of the shell and on the back of the cuff. Different thicknesses are used to optimise the weight. It can be combined perfectly with the Dual Core technology.

STRUCTURE GENERATIVE DESIGN GRID

The Generative Design Grid structure of the Alltrack boots allows material thicknesses to be reduced to save weight, while ensuring a sufficiently rigid structure for excellent skiability.

HIKE MODE (ALLTRACK)

1/ An optimised axis of rotation - 6 mm lower.

2/ A new construction at the bottom of the shell cut away at the rear.

> wider opening of the cuff towards the rear angle range of motion = 50° for very high freedom of movement on ascents

3/ A metal/metal unlocking mechanism for the cuff to create a more rigid boot structure. This design results in a higher flex index and a level of performance close to that of a boot with a fixed cuff.

POSITION OF THE AXIS OF ROTATION (HI-SPEED)

To adapt to the current ski, the position of the axis, which has a major influence on the structure of the boot, has been modified.

AXIS OF ROTATION VS ALLSPEED

The axis of rotation is positioned 1.2 cm higher.

- More edge-to-edge effectiveness
- Greater precision
- More stability in turns

AXIS OF ROTATION VS HERO

Same angle, same height as the HERO boots, but the axis of rotation is further forward: 1 cm.

- Less radical and aggressive
- Easier turn initiation
- More progressive flex

SENSOR MATRIX (104MM)

The design of all 104 mm boots is structured to wrap the foot more effectively and give the boot an original personality.

JUNIOR CELLULAR DESIGN

The boot design is intended to be close to the foot, with thin layers to save weight. The HERO J4 model weighs 1,090 g (1/2 pair). It also allows excellent progressive flexion, which is essential for good skiability.

FOREFOOT INSERT (ALLTRACK)

To allow smoother foot entry, an insert made from flexible materials is positioned at the top of the shell for easier opening of the sides.

This ensures that the boot is still easy to put on, despite the high flex index and very rigid plastic materials.

DUAL CORE

DUAL CORE involves injecting materials with different hardness levels or of different types into the same mould. The result is a sandwich construction with an ultra-thin layer of hard materials on the outside encapsulating the softer materials inside. This makes it possible to create zones of different hardness on the boot, without adding layers of plastic.

This technology can be used to accurately fine-tune the progressive flex, rear support and rebound.

DUAL CORE RACE

The entire HERO WORLD CUP and HERO range features the DUAL CORE technology.

The process involves three injection points on the shell and two on the cuff. This technology can be used to accurately finetune the progressive flex, rear support and rebound. It also allows for highly effective lateral power transfer.

DUAL CORE ALLTRACK

The DUAL CORE technology works in synergy with the Generative Design Grid. It makes it possible to reduce weight while retaining rigidity. This is essential to ensure a high level of skiability.

On the ALLTRACK boots, the Dual Core technology is used on the lower part of the shell - which increases torsional rigidity and makes the boot easier to put on.

DUAL CORE HI-SPEED

In black: PU + Carbon
In grey: PU

CARBON DUAL CORE

The first injection is made using Polyurethane reinforced with carbon fibres. On the one hand, this very rigid material helps to strengthen the lower part of the shell and optimise resistance to flexion and torsion, and on the other hand, it strengthens rear support, thus increasing the boot's precision.

ASYMMETRIC DUAL CORE CUFF

The DUAL CORE technology helps to strengthen the inner side of the cuff to provide better grip in turns and greater support.

LINER

LINER 5 ZONES

PRE-SHAPED FULL CUSTOM

The liner is entirely thermoformable (external stem/ padding and tongue)

What makes it different is a special construction that allows a high level of thermoforming in the ankle bone, metatarsal (1st and 5th) and navicular zones to mould perfectly to the shape of the foot - while the rest of the stem retains its properties for perfect support. This ensures excellent support and therefore very high technical properties.

PRE-SHAPED LINER

The liners are pre-shaped around the ankle bones for greater comfort and support.

SEAMLESS TOE BOX

To increase the efficiency of the thermal insulation - we have designed a liner with a toe box that retains heat inside the liner. Thermographic studies show that this new design has reduced energy wastage by around 20%.

FULL CUSTOM LINER

For improved precision and performance, these liners are fully customisable to mould perfectly to the shape of the foot. The internal padding, external stem and tongue are all customisable.

FULL CUSTOM LINER

Customisation is carried out using the new thermoforming machine - True Form Moulding Unit - using heated covers for greater effectiveness on the stem - with the Alpine programme. - 8 mn.

CUSTOM LINER

Only the internal padding of these liners can be customised.

CUSTOM LINER

THERMAL INSULATION

THINSULATE® STRETCH

Used mainly in clothing, this extremely fine fibre improves freedom of movement thanks to its elasticity. In a liner, it works ideally with the other materials to provide perfect foot support for great skiability.

WINTHERM®

Wintherm proved to be an especially effective thermal insulator in our laboratory tests. Positioned at the forefoot, it comprises a sheet of micro-perforated aluminium that allows air to circulate and a polar fleece material to guarantee warmth and comfort.

CONFIGURATION

Configuration is a key asset for these new boots - all the settings combined with CUSTOMISATION of the liner allow you to offer customers a real benefit in terms of both comfort and performance.

PERSONALISATION

FLEX ADJUSTMENT

The boot's flex can be adjusted up or down by changing the position of the screws on the back of the cuff. Central position - the flex shown on the boot. Moving the screws as pictured in the diagram allows you to adjust the flex by 5 points (+/-).

FORWARD LEAN ADJUSTMENT

This setting allows you to adjust the forward lean of the boot to make it more aggressive.

In standard position - when the boot comes out of the box - the spoiler is in the low position and the angle is 10.6°. Adjusting the spoiler to the upper position creates a 6 mm forward lean and a 6 mm height gain, for a forward lean angle of 12.6°.

CANTING

Adjustment of the lateral angle of the cuff by +/- 1° to adapt to the shape of the lower leg.

CATCHES

The catches on the cuff can be adjusted to 3 positions to increase or reduce space for the calves.

MATERIALS

GRILAMID: This Thermo-Plastic material is one of the lightest on the market and offers very good resistance. It can be used with high-density modules to reduce thicknesses. The ALLTRACK ELITE 130 LT, ALLTRACK ELITE 110 LT WOMEN, ALLTRACK PRO 120 LT models all have Grilamid shells.

POLYURETHANE: All boot shells in the ALLTRACK range are made from Polyurethane for better skiability and easier entry/exit.

GRIPWALK

All Rossignol boots are:

- Pre-mounted with Gripwalk heelpieces - which are easily recognisable: thanks to their markings and a colour code on all models (the rigid areas are orange)
- Gripwalk compatible: We have 4 Gripwalk heelpiece models for all boots in the range.

CUSTOMISATION

TRUE FORM MOLDING MACHINE

The customisation machine has been developed by the Rossignol R&D teams to optimise the customisation of the new HI-SPEED and PURE boots. It consists of 2 tubes that propel hot air into the liner.

Optionally, heated covers can be used for complete customisation by heating the stem of the liner.

3 PROGRAMS

PRE-HEAT: 2 minutes' heating - to heat the boots to the right temperature for trying on.

NORDIC: 4 minutes' heating to customise Nordic boots.

ALPINE: 8 minutes' heating to customise alpine boots.

RVL1100
HEATED-COVER KIT
HEATED COVERS

PROCESS

This involves shaping the liner to the skier's foot.

We have developed a new thermoforming machine - the TRUE FORM MOLDING UNIT - which allows highly precise thermoforming.

This machine has an arm that blows air at a temperature of 80° to thermoform the padding and tongue. But the biggest innovation is the use of heated covers - inspired by the motor racing world - to thermoform the external material of the liner for a perfect result.

1. FULL CUSTOMISATION - HOT AIR + HEATED COVERS

Ultimate customisation.

- Place the liners under the arm.
- Close the sleeve.
- Wrap the liner in the heated cover.
- Press "Alpine".
- Heat the 2 elements for 8 minutes (automatic timer).
- Leave the liners for 2 minutes and then put them back in the shells.
- Put the boot back on the customer's foot. Tighten it slightly and leave it on for 10 minutes with the buckles closed.

2. CUSTOMISATION

Liners in the shell or outside the shell if you prefer.

- Place the boots under the arms.
- Pull up the sleeve and fasten it below the buckle on the cuff.
- Press "Alpine".
- Heat for 8 minutes (automatic timer).
- Leave for 2 minutes before putting it on the customer's foot.
- Tighten it slightly and leave it on for 10 minutes with the buckles closed.

3. QUICK FIT

Comfort heating - Quick heating inside the liner.

- Liners in the shell
- Place the boots under the arms.
- Press "Pre Heat".
- Heat for 2 minutes (automatic timer).
- Ready for a quality test.

ROSSIGNOL WOMEN

The history of skiing is full of legendary women who've defied norms, set unparalleled records, and inspired everyday skiers around the world. Rossignol has long stood at the heart of these stories, as a brand innately entwined with the spirit and success of female skiing. Tessa Worley, Federica Brignone and Petra Vhlova are just a few of the icons that alongside Rossignol, changed the face and history of skiing.

Our skis have been a steadfast partner to female leaders for over a century, offering reliability in every glide and turn, drawing on a deep technical understanding of their needs to ensure our equipment is intuitive and natural, mirroring the skier's intentions with unparalleled predictability and precision.

WOMEN TALK TO WOMEN

The women collections are developed by a women team. They know perfectly the women needs and how to communicate to the final consumer. Every pair of skis, every boot, tailored specifically to the needs and desires of women around the world allows them to tap into their greatest potential, to perform at their best, and bring moments of joy both on and off-hill.

OUR MANTRA

When you introduce Rossignol women's equipment, you're offering more than just a singular product. You're sharing a legacy, a story of champions, and proposing the unconditional confidence we can deliver as a brand that respects and uplifts the aspirations of every female skier.

We attach especial importance to **the fit, the technicity, the graphism, the materials, the colors.** We reassure women with the **good words, to create confidence and desire.**

NOVA

CARVE CONFIDENTLY

ENTER IN THE **NOVA UNIVERSE**

NOVA

OUR NEW RANGE OF WOMEN'S CARVING SKIS

Women skiers embody femininity and style, but they are also determined and daring skier.

Nova is as intuitive and subtle as they are...until they step on the gas.

Sometimes they lack self-confidence, so when it comes to ski, they need to be sure that they will be safe, with a ski that grips, is stable and tolerant for them to fully let go.

Rely on NOVA to let them carve confidently and to reveal the best skier they can be.

CONFIDENCE & SECURITY

V-Profile technology: Grip improvement, secured turns, stability, tolerance, vibration absorption.

New tip shape with an oversize sidecut: Intuitive turns, easy control.

PERFORMANCE & FUN

A new carving shape for great feelings.

An easy access to carving for all the ski levels.

Good reactivity in turns.

LIGHTWEIGHT

One of the lightest ski on the market. Nova skis have the perfect balance between **lightness** and **performance**, to keep grip and confidence.

Total weight of skis and bindings, in pair: 4.5 kg. (NOVA 6)

WOMEN SKIBOOTS

The Rossignol Women philosophy permeates the construction of our ranges and products.

- A unique range organisation designed and developed for women.
- No technical jargon, just simple words that everyone can understand. We focus on the benefits.
- We are guided by what appeals to women, such as thermal insulation.
- We take great care over the designs and finishes, and the choice of materials and colours to create products that leap off store shelves and catch women's attention. The aim is to build a special bond that inspires trust and desire!

VIZION

THE GAME CHANGER

A short range with a powerful visual impact - white/white collection. All the boots in the range feature the same colour, namely white, and the only difference is the colour of the double buckle and the rear part to highlight their function.

TECHNOLOGIES

STEP IN TECHNOLOGY

For a full technical explanation, refer to page 54-55.

DEDICATED WOMEN'S CUFF

The cuff on the Vizion boots is cut lower and tulip-profiled to suit the female body shape.

MERINO WOOL THERMAL INSULATION

The most thermally insulating material has been selected for the women's boots in the VIZION range.

See technical charts pages 78-81.

PURE

The must-have range for women has been completely overhauled this season without losing any of its femininity or sports-oriented performance. The boots are available in three lasts (Skinny, Slim and Regular) with flex from 120 to 70 to meet the needs of all skiers, from the most demanding to the least technically proficient.

The Heat models have their own gold and silver identity.

HEAT MODELS

The **PURE PRO HEAT** model features a heating system that can be adjusted via Bluetooth using a Therm-ic® app - available to download free of charge using the attached link.

www.therm-ic.com/fr/content/13-application-thermicheat-control

This app allows you to very easily adjust the temperature setting. Two modes can be used to manage the batteries.

- **ECO MODE** allows you to choose a heating period - for example: 4 minutes heating followed by 2 minutes off.

- **MOVEMENT MODE:** heating starts each time the skier stops.

USAGE TIPS

Using the batteries - The batteries must be charged before using for the first time.

1. Connect the USB cable. The charging indicator lights up and turns green. Then plug in the two connectors linked to each boot. The indicator turns red and charging begins.
2. When the batteries are fully charged, the charging indicator turns green. Charging stops automatically. The charging time is between four and six hours.
3. Unplug the two boot connectors from the USB cable.
4. Connector trap on the Boot Integrated System. During and after charging, the Boot Integrated System remains in the mode in which it was set before charging.

INSTRUCTIONS FOR USE

The heating system integrated in Thermic® ski liners has four modes: stop and levels 1, 2 and 3. These modes are indicated by the LED for the heating speed. The number of flashes of the LED indicates the selected heat setting. The integrated heating system can be adjusted to three different settings (level 1, level 2 and level 3) using the control panel.

If the LED indicating the heating level is not illuminated, this means the heating system integrated in the Therm-ic® ski liners is switched off.

SWITCHING ON:

Press and hold (for around 3 seconds) the function button to set the integrated system to the lowest heating level. Holding the button for more than 6 seconds will cause the liners will go into safety mode and switch off.

SETTINGS:

Press the function button once (for around a second) to increase the heat setting (level 1, level 2 or level 3).

- **Level 1:** one flash, low heat setting.
- **Level 2:** two flashes, medium heat setting.
- **Level 3:** constant illumination, high heat setting. If the system is in pause mode, you will first need to activate it.

PAUSE MODE:

If you do not press the button within 10 seconds, the system will switch to pause mode. Press the function button (for around a second) to activate the system, which will then switch back to the last selected heat setting.

SWITCHING OFF:

To switch off the system integrated in Therm-ic® ski liners, press and hold the button (for three seconds, until the heat setting LED is no longer illuminated).

INSTRUCTIONS FOR THE BLUETOOTH PAIRING SYSTEM

1. Enable Bluetooth on your phone and then open the Therm-ic® Heat Control app.
2. Connect the batteries: when the start screen appears, switch on your two batteries by pressing and holding each button. Continuous illumination of the red LED indicates that your batteries are switched on. Rapid flashing of the LED shows that Bluetooth is now enabled.
3. Add the batteries: click the "+" button in the middle to show your batteries in Bluetooth. Then click "add" to connect the two batteries to your phone.
4. Heat settings: the first screen allows you to adjust the heat setting for both batteries at the same time. You can increase or reduce the level of heat from 1 to 10. You can also switch off the heat temporarily by pressing pause.
5. Heat settings - individual: the second screen allows you to adjust the heat setting for each battery individually. By default, they are at the same level, but this option can be customised.

ALLTRACK

It goes without saying that women need to strike the perfect balance between performance and the right weight for exploring everything that the mountain playground has to offer. An extensive and colourful range for the most demanding customers.

CUSTOM LINER **POLAR**

LINERS TECHNOLOGY

All women's boots have liners that are specifically designed to suit the female body shape.

Women's liners are cut lower to accommodate differences in calf shape. They also have a more open shape for a more comfortable fit. The padding in the upper liner is very flexible to prevent any discomfort around the calf. The lining materials are very soft and comfortable, and are designed with a simple objective in mind: to make you want to put your foot in the boot.

HOW DO YOU CHOOSE YOUR FIT?

To make it easier to understand the different fits available, we have drawn our inspiration from the clothing industry and arranged our fits into four categories. The different fits have been designed to address various foot shapes and also deliver the level of support required, bearing in mind its direct influence on performance.

skinny fit

98 mm

An extremely narrow fit for women skiers in search of excellent support to ensure a high level of skiability. It is also the ideal fit for women with slender feet looking for excellent foot support.
Last 98 mm

slim fit

100 mm

A narrow fit for all proficient women skiers prioritising perfect foot support without any trade-off in comfort.
Last 100 mm

regular fit

102 mm

A classic fit that will satisfy a large number of women skiers wishing to strike the perfect balance between support and comfort.
Last 102 mm

relax fit

104 mm

A generous fit for all women skiers looking mainly for comfort, as well as for all those with fairly wide feet.
Last 104 mm

THERMAL INSULATION

Dedicated thermal insulation: since insulation is especially important in women's boots, all liners have passive thermal insulation based on the following materials: **MERINO** wool, **WINTHERM**® and **THINSULATE**® PLATINUM. Our laboratory-based thermal imaging studies show that these materials give our liners excellent thermal insulation.

THE LINERS HAVE EITHER:

1. TOTAL THERMAL INSULATION: the insulator is all around the foot.

2. FOREFOOT THERMAL INSULATION: the insulator is around the forefoot in the toe area.

MERINO WOOL

More than a thermal insulator, Merino wool is a natural thermal regulator. Its main qualities are: thermal control, soft feel, breathability, odour control and fast drying.

WINTHERM

Wintherm proved to be an especially effective thermal insulator in our laboratory tests. Positioned at the forefoot, it comprises a sheet of micro-perforated aluminium that allows air to circulate and a polar fleece material to guarantee warmth and comfort.

THINSULATE® STRETCH

Used mainly in clothing, this extremely fine fibre improves freedom of movement thanks to its elasticity. In a liner, it works ideally with the other materials to provide perfect foot support for great skiability.

PRIMALOFT

Recycled fiber used for technical gear insulation. Very light which is very consistent with Alltrack LT liners. The combination with the other materials of the liner gives a perfect foot hold to improve skiability.

SHELLS

Women's boots use the same shells as unisex boots which means that all features relating to the last, fit and performance are identical.

GENERATIVE DESIGN STRUCTURE + DUAL CORE

This specific design allows different thicknesses to be distributed according to the zones of the boot to obtain the right WEIGHT. On the PURE boots, the Generative Design is applied more softly on the cuff with thinner layers to respect the lower leg wrap. The associated DUAL CORE technology boosts the boots' performance.

CUFFS

The height of the cuff is significantly lower in comparison with a unisex cuff. The tulip-shaped rear section easily accommodates a woman's natural calf shape. It is less structured to take better account of female skiers' power.

PERSONNALISATION

Personalisation involves adjusting all possible 'mechanical' settings to tailor the boot to the skier's foot.

Adjustment of flex - canting, catches.

CUSTOMISATION

This involves shaping the liner to the skier's foot - using the Thermo True Form Moulding machine - for details of the process see page 67.

2 types of customisation:

FULL CUSTOM: stem, padding, tongue
CUSTOM: padding

LINER 5-ZONE FULL CUSTOM

The **PURE ELITE 120** model has a 5 ZONE FULL CUSTOM liner - with highly thermoformable ankle bone, metatarsal (1st and 5th) and navicular zones to mould perfectly to the shape of the foot - while the rest of the stem retains its properties for perfect support. This provides the assurance of excellent support and consequently very high technical performance.

SEAMLESS TOE BOX

To increase the thermal insulation, we have designed a liner with a toe box that retains heat inside the liner.

Thermographic studies show that this new design has reduced energy wastage by around 20%.

DOUBLE STRAP

This innovative and patented strap is very intuitive to handle. It makes the buckle easier to use by allowing you to close it with both hands - in a straight line. It is therefore extremely efficient and precise - with a very wide tightening range.

ESCAPER IMPACTS HELMET

From sweaty, technical climbs to epic, far-out descents, Rossignol designed its new ESCAPER helmet for life beyond the boundary lines—to go where you want to go. Fast and light and triple-standard rated for both skiing and mountaineering, it's the helmet of choice to discover all the adventure your own two feet can deliver. It's time to escape.

GOGGLES

BE THE CHANGE, BE ESSENTIAL

Introducing the Essential Helmet and Goggle, featuring all the technology you've come to expect from Rossignol—lightness, multi-impact protection, comfort, clear field of view—made from as much recycled material as possible, without any compromise on protection or performance. Now you can stay safe from Mother Nature while helping protect her, too.

R-clip

R-clip technology allows you to click in and out of your pole grips with the same ease as bindings, providing perfect hand positioning and a far more sturdy connection to the pole. Compatible with carbon shafts, the alpine grip is made from a single plastic so the grip can be recycled, the Nordic grip is made from cork with a redesigned strap that's more ergonomic than ever.
