

ANOTHER BEST DAY

2022-2023  
**NORDIC**  
C A T A L O G

# WHAT'S NEW?

Rossignol's nordic offering continues to evolve and adapt to new market and skier expectations. This offer pushes innovation further and new products are arriving in all categories : nordic skis, boots, bindings or poles.

These new products come together through 3 new stories:

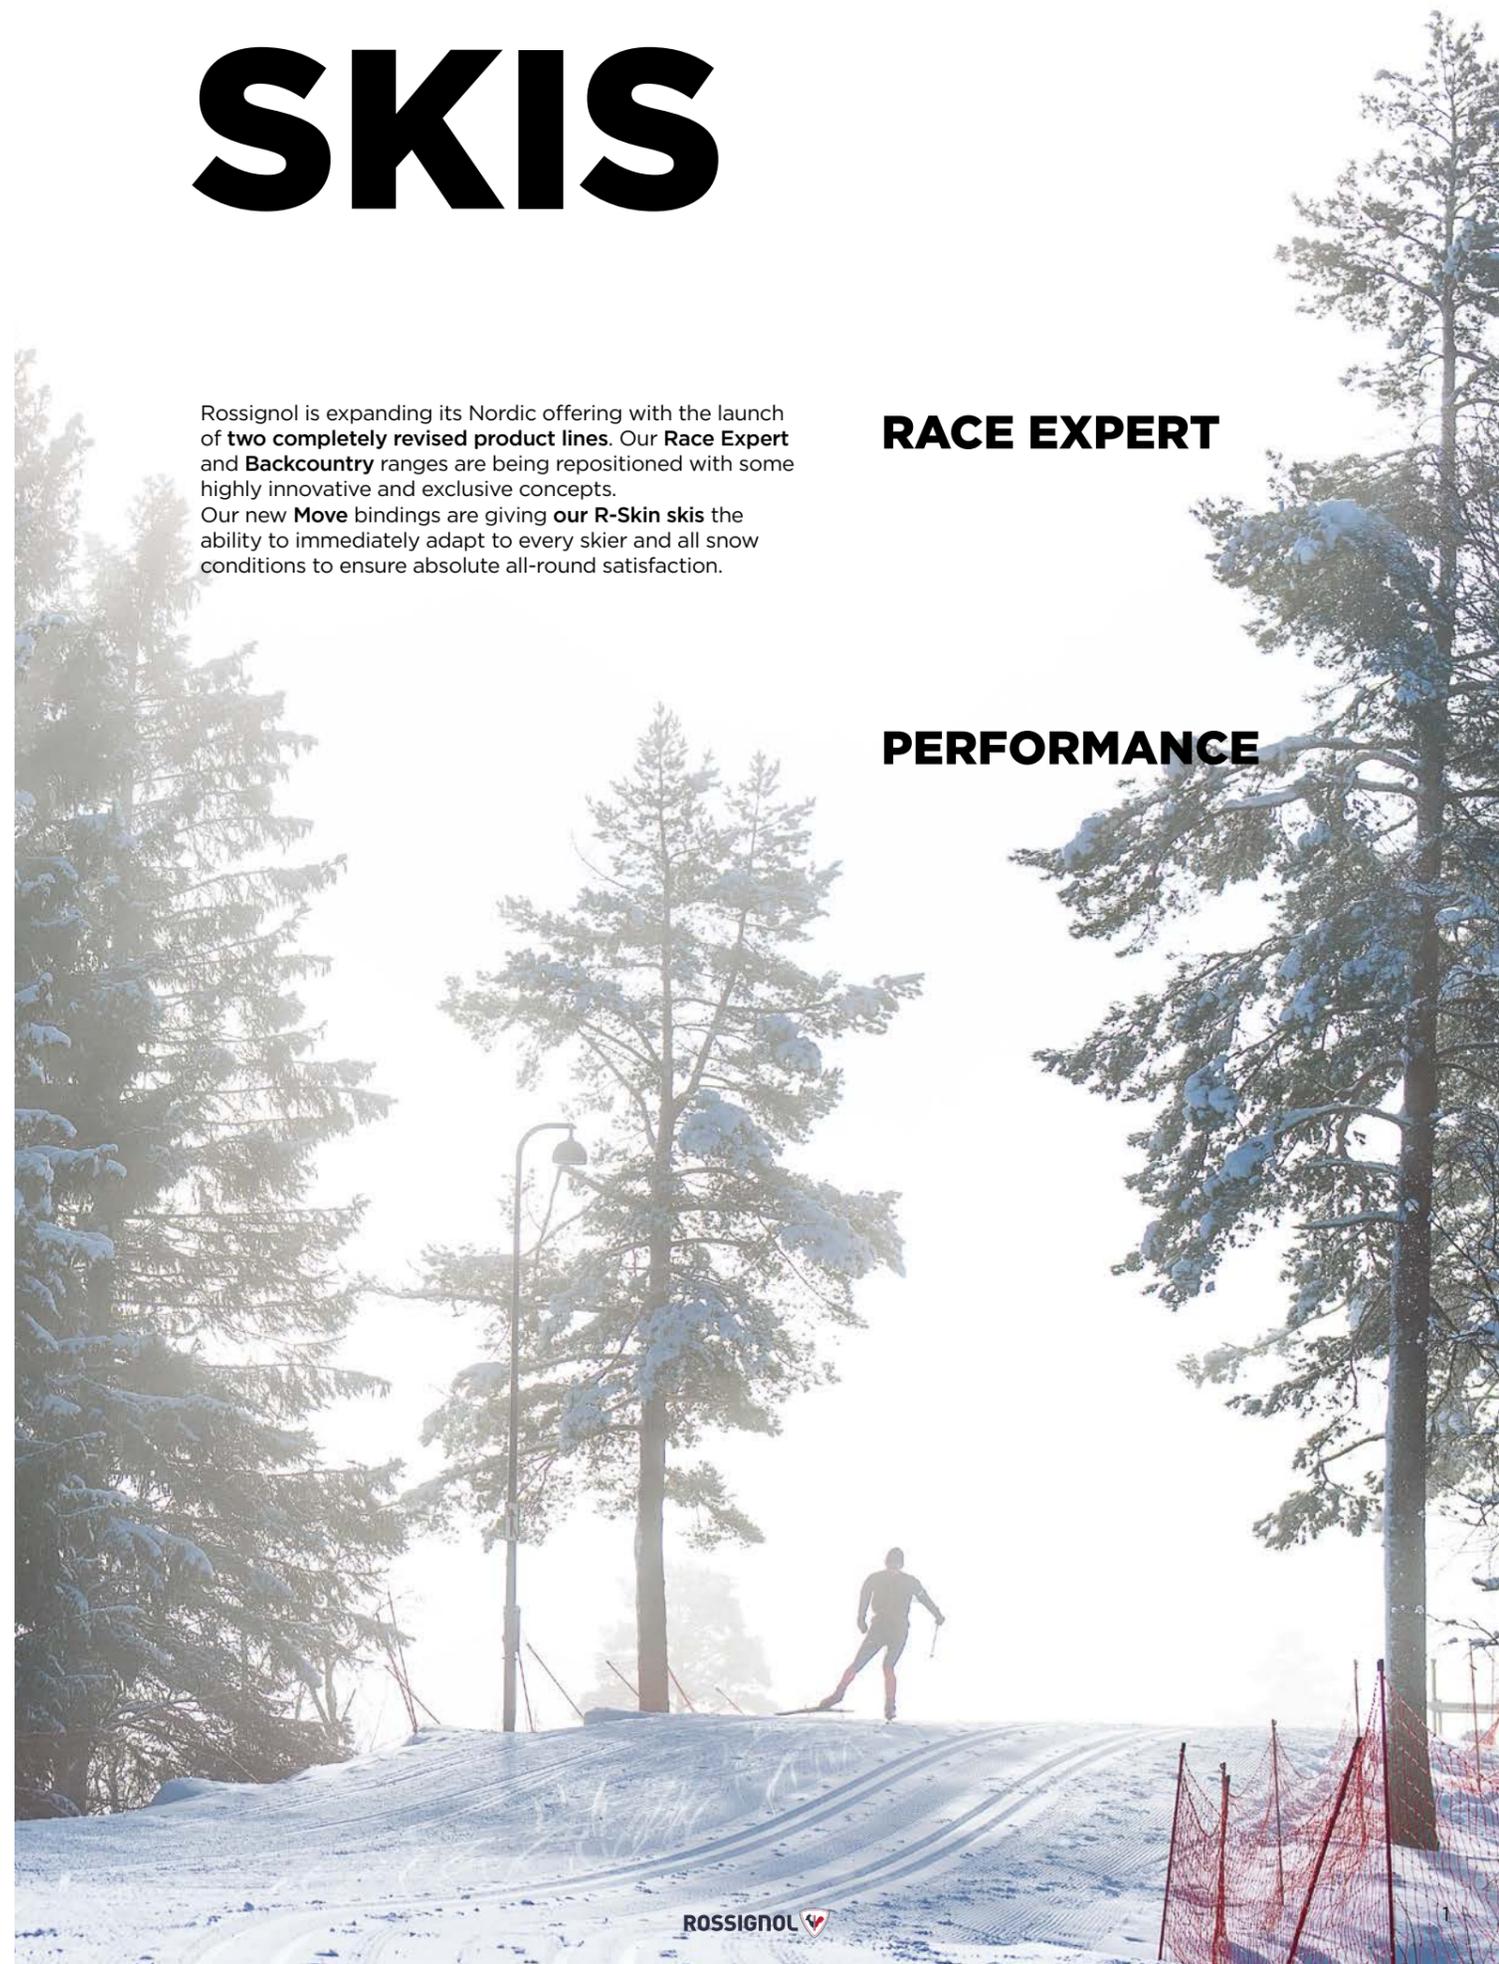

# SKIS

Rossignol is expanding its Nordic offering with the launch of **two completely revised product lines**. Our **Race Expert** and **Backcountry** ranges are being repositioned with some highly innovative and exclusive concepts. Our new **Move** bindings are giving our **R-Skin skis** the ability to immediately adapt to every skier and all snow conditions to ensure absolute all-round satisfaction.

**RACE EXPERT**

**PERFORMANCE**

# LESS IS MORE

The big new arrival this year is the **X-IUM Premium+** line in the **Race Expert** range.

To boost performance, the Rossignol Research and Development team drew inspiration from the “**less is more**” approach, reflected in simple elements, pure lines and understated materials in areas such as design and architecture. Rossignol has adopted this trend in its new products.

By eliminating, as far as possible, any aspects that were not absolutely vital to the ski's performance, the R&D team was able to focus on one essential requirement: reducing weight. **The X-IUM Premium+ is inspired by the theory that it is possible to achieve more with less.**

Streamlining the topsheet of the ski has resulted in a saving of **80 grams per pair**. Performance has been enhanced with a more efficient and easier to handle ski. The lighter weight also improves the ski's acceleration and reduces energy wastage. Breaking away from market habits, **the X-IUM Premium+** will meet the expectations of competitors and skiers looking for high performance and technical excellence.

# SKATING

Rossignol has always had a very strong skating culture and our market share demonstrates our leadership in this sector. Numerous World Cup wins, the quality of our products and our expertise have enabled us to develop an exceptional skating offering divided, of course, into our **Race Expert, Race Performance and Junior** ranges. There is no doubt that our “less is more” concept will add a new dimension to our Race Expert range, and in particular the **X-ium Premium+** products.

# R-SKIN

The **R-Skin** range makes Classic skiing accessible to everyone with great ease and comfort. Whether you're an expert looking for performance and thrills or simply trying to get away from it all or relax, the **R-Skin** range meets the expectations of all types of skiers. **This ready-to-ski concept**, suitable for modern life, adds a new dimension to the discipline and offers all the thrills of gliding. The **R-Skin** series benefited this year from the arrival of two new bindings, **Move Switch** and **Move Race**, that can be moved to different positions on the ski to increase grip or glide without having to take your skis off. **Convenient, time saving and efficient!**

## FOR ALL TYPES OF SKIERS

### EXPERTS

Looking for precision, performance and efficient gliding, as well as technical products because they like challenges.

### EXPERIENCED

Share the values of well-being and outdoor sports and look for accessible products. Value the effort without the complexity of technical products.

### BEGINNERS

Are attracted by outdoor activities. A product with easy access that will appeal to them.

# ESCAPER

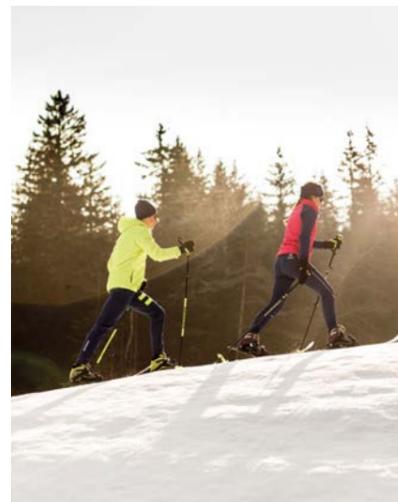

CALLING  
ALL OUT

The mountain is a source of inspiration. It is perceived through its verticality and the transversality of the seasons it passes through. On foot, running or walking, gliding over ski slopes or beyond, on a mountain bike in summer or winter... There is more than one way to approach and discover the mountain. The choice is yours. It's up to you to choose the pace and style. From small adventures to great epics, in summer or winter, our **Escaper** range will accompany you in each of these moments. It is the **ideal fusion of all your desires**.

A natural extension of Nordic skiing, **Backcountry** skiing is a complementary and transversal discipline to all outdoor sports (mountain biking, trail running, hiking, ski touring, etc.). With a strong environmental approach encouraging adventure and discovery of nature, it meets increasingly on-trend values with an emphasis on the concepts of effort, escape and adventure.

# BACKCOUNTRY

Backcountry skiing is at the very heart of Rossignol's identity and this year the company has decided to draw inspiration from its Escaper philosophy, focusing more on ski touring, to develop its range.

# BINDINGS

The bindings offer is consolidating and diversifying this year. In addition to the complete Turnamic offer, Rossignol is coming with a new Back Country binding, the Xplore, which is revolutionizing Back Country practice. This binding offers extraordinary possibilities of skiability and ease.

## TURNAMIC®

Turnamic bindings have become essential on the market as the benefits to consumers and distributors are numerous and well known: ease and speed of assembly, customization to the needs of skiers, adaptation to the requirements of the slope profile, stability, control, behavior.

1

### TURN LOCK

The ergonomic design of the lever with secure-grip soft components enables intuitive handling when stepping in and out of the binding. Haptic and acoustic response when opening and closing. Protected against unwanted opening.

2

### STEP IN

The step-in latches the boot in the binding without having to touch the lever. The closing click ensures that the binding is properly closed.

3

### HEEL PRE-ADJUST

Adjustable heel section where the boot size is preselected using snap hooks on the heel rails. The heel is automatically positioned with it when the position is adjusted so no separate adjustments are necessary later.

4

### LOW PROFILE

The minimalistic design height ensures a low stand position and maximum stability as a result. This means a more stable gliding phase and a direct feel on the snow at the same time.

5

### FLEXOR SKATING

With flex grade 11.0 and progressive power flow. Pre-load technology ensures the best ski control from the beginning of the motion. 40° working angle (amplitude), tool-free changeover, secure fit inside binding housing and low-wear material are what make this high-performance absorber stand out.

6

### TORSION PROOF BODY

The geometric design of the binding body delivers excellent torsional rigidity for direct and effective power transfer.

7

### FLEXOR CLASSIC

With flex grade 5.0 and slightly progressive power flow. Pre-load technology ensures the best ski control from the beginning of the motion. 45° working angle (amplitude), tool-free changeover, secure fit inside binding housing and low-wear material are what make this high-performance absorber stand out.

8

### DOUBLE LOCK SLIDER/CLIP LOCK

Double locking clip for easy and safe fixation and adjustment of the binding on the IFP (Integrated Fixation Plate). The step-in mechanism makes it extremely easy to step into the binding. You can hear the "click" when the binding is closed properly.

9

### SAFE LOCK

It provides an extra level of safety for racers who start in a line and need to be sure there is no risk of unexpected pre-releasing, even in the event of crushing at a mass start or a long-distance start.

10

### FLOWFLEX

The two part-plate and click-in setting with two closely arranged pins not only guarantees double the safety but also that the binding is fixed on one point. The rest of the binding housing has a floating bearing design along the entire length which has no negative effect on ski performance.

# RACE MOVE

The **MOVE** concept is a binding that makes it possible, at any time and at lightning speed, **without even taking your skis off, to adjust your position on the skis to increase grip or glide** depending on the snow conditions, level of fatigue or the terrain. The binding is available in two models: **Move Race and Move Switch**.

## MOVE SWITCH CL

INTERFACE	IFP
MECHANISM	MANUAL
PLATFORM	55 MM
SIZES	35 - 52

# BOOTS

The big new arrival in Rossignol's Nordic ski boot range is the new **Race Expert** line. Not forgetting exclusive and innovative concepts for the X-IUM products with a new rigid carbon structure on the World Cup skis and inspired designs across the entire range.

In **Backcountry**, the new **X-plore** base is making its entrance with revised designs across the entire range with the new-look **X-10** and **X-8**, and a very special mention for the **X-10 Classic** and its brand-new **Tech Control Wrap** concept that offers skiers exceptional stability in all snow conditions and terrain.

**RACE EXPERT**

**RACE PERFORMANCE**

## NEW RACE EXPERT

Nothing has been left to chance in the **Race Expert range** when it comes to **weight, performance or efficiency**. The finest materials have been used to raise the level even higher. Perfected with the help of our best racers, these boots allow all World Cup athletes to go **one step further**.

# RACE EXPERT SKATING

The X-IUM Premium + Skate boot has been designed for competition and combines performance, precision and efficiency. Its one-piece carbon back stiffeners improve performance with greater torsional rigidity for enhanced foot support. This ultra-light boot helps to save energy while optimising ski control.

The Spiral Zipper concept is another feature. The zip spirals around the calf to allow more freedom of movement around the ankle for the skier, with greater freedom for the foot at the front and back of the boot.

# RACE EXPERT CLASSIC

Rossignol is rising to every challenge with the X-IUM Premium Classic +. Thanks to its Thermodur carbon chassis, this boot offers a fusion of **extreme lightness**, maximised front flexion and optimised torsional rigidity.

The **Spiral Zipper concept**, which wraps around the calf, and higher stem enhance comfort, foot support and freedom of movement and maximise sensations on snow.

NORDIC  
2022-2023

NORDIC

## RACE PERFORMANCE CLASSIC

Rossignol's **Race Performance** range is based on strong concepts such as **TECH CONTROL WRAP**, an internal cuff developed to provide greater stability in Classic skiing,

as well as **DUAL CORE**, designed to allow very precise adjustment of hard and flexible areas on the external structure of the boot.

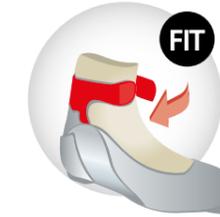

### X-10 CLASSIC

### TECH CONTROL WRAP

The new **TECH CONTROL WRAP** concept developed on the X-10 Classic gives this boot an **exceptional level of stability** in classic technique whatever the type of snow and terrain. This **ultra-light** collar, which wraps around the ankle, establishes an extremely effective connection between the ankle, the upper of the boot and the rigid parts. It is both flexible and very efficient and allows the skier to make real progress in all phases of guiding and controlling the ski, as well as in descents.

# BACKCOUNTRY

The development of **Backcountry** called for innovation and new concepts. The result is **Xplore**: a combination of boots and bindings integrated in this completely innovative

approach. It encourages better mobility and provides greater stability and control. **It therefore expands horizons for both novices and experts.**

XP-12

# JUNIOR

We pay particular attention to young skiers, for whom we have developed a complete range of boots tailored to their body type and level of proficiency.

The **Racing** boots benefit from top-of-the-range advances, while the **Touring** boots incorporate the finest materials to ensure comfort and warmth.

# WOMEN

Rossignol is for skiers of all levels and skiing disciplines. We have therefore developed specific boot dimensions, materials and designs. **Rossignol's For Women** line is a complete range extending from the **Race Expert** segment to **Touring** and **Backcountry**. This range is naturally also inspired by technical innovations developed on unisex products. **The emphasis is always on three elements: warmth, comfort and perfect adaptation to skiers' body types.** Our women World Cup athletes are, of course, asked to help us develop our **Race Expert and Performance** boots.

## RACE EXPERT

With its **Race Expert** sole, **Carbon "Thermo adjustable Fit" cuff** and adjustable strap, the **X-IUM World Cup** boots have been developed for women looking for high-performance, lightweight and efficient equipment.

**X-IUM W.C. SKATE FW**

HEEL	NEW CARBON REINFORCED HEEL

SIZES	35 - 43,5 (1/2 SIZES)

**RILO210** X-IUM W.C. CLASSIC FW

## PERFORMANCE

The **X-10** and **X-8** models are built with the **DUAL CORE concept**. Rossignol's exclusive co-injection process makes it possible to pinpoint more rigid areas of the cuff and back stiffener for **optimum stability, ease, control and**

**efficiency, while at the same time retaining more flexible areas** to create a level of comfort that will be particularly appreciated by women skiers.

**X-10 SKATE FW**

# BOOTS TECHNOLOGIES

This year Rossignol completes its range of TURMANIC® soles with two new carbon COURSE soles. Thanks to the **CARBON THERMODURE** technology, the sole-back stiffener becomes one unit, for precision and maximum

energy transmission. This sole-back stiffener unit creates an extremely highperformance carbon chassis when it comes to steering the ski.

## SOLES TURNAMIC®

A RANGE OF SEVEN DIFFERENT SOLES SEGMENTS OUR BOOT RANGE TO MEET TO THE VARYING EXPECTATIONS OF USERS.

1

### CARBON PREMIUM SKATING

Technology:  
• CARBON THERMODUR  
Rigidity and flex skating.

2

### CARBON PREMIUM CLASSIC

Technology:  
• CARBON THERMODUR  
Rigidity and flex classic.

3

### CARBON EXPERT SKATING

Technology:  
• CARBON  
Rigidity and flex skating.

4

### EXPERT SKATING

The rigid central "Carbon Aspect" insert provides strengthened torsional rigidity.

5

### EXPERT CLASSIC

The flexible central insert allows for a natural foot roll during propulsion.

7

### TOURING

The flexible central insert gives the boots optimum comfort as well as torsional rigidity for added stability.

## THE CHASSIS

### 3 POSITIONS SENSOR

The sole is built around three fundamental support points: the front of the first and fifth metatarsal bones and the heel to maximise the performance and comfort of the boot.

### AXIS PROTECTOR

Our competitors mould the binding axis directly into the sole. Rossignol has adopted a different approach by integrating the axis into an independent and extremely hard-wearing plastic part, which is then incorporated into the chassis to avoid stiffening the front of the boot while retaining all the flexibility and roll of the foot during classic cross-country skiing. This technology is available in all the ranges and gives classic boots a similar feel to running shoes with greater sensations when propelling.

## THE CENTRAL INSERT

Rossignol has designed various inserts to give each sole a specific set of attributes tailored to each technique (skating/classic) and the level of use (race/sport/touring). By manipulating their materials and their density and altering the shape of the central insert, each sole excels in behaving exactly how skiers need them.

1

### FOR SKATING MODELS

A "Carbon Aspect" central insert increases the sole's torsional rigidity. Its specific Skating shape improves efficiency during propulsion and increases stability when striding.

3

### FOR SPORT PERFORMANCE MODELS

A bi-technical insert brings the best compromise to boots designed for our sports customers.

## LOW PROFILE

The sole boasts a slim-line design, so that the skier's foot is as close to the snow as possible, thereby delivering lightness, feeling and superior control.

## GRIP TECH

Crampons with a unique design and composition for comfortable and safe walking.

2

### FOR CLASSIC MODELS

A soft plastic central insert allows for natural foot roll during propulsion and a double guide groove across the entire length of the sole offers better control for groomed trails.

4

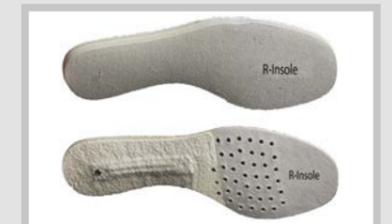

### FOR TOURING MODELS

An extremely soft and flexible central insert produces a comfortable boot with excellent torsional rigidity for even greater stability.

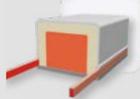

## THE MID SOLE

The mid sole acts as an interface between the external sole and the boot. It determines the required flexibility and rigidity. Their importance is such that Rossignol is focusing its development efforts on the comfort and ergonomics that mid soles can procure.

## 1 EXTERNAL CONSTRUCTION

CONTROLLEDGE

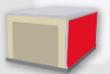

**EDGE ENERGY SENSOR**  
A stiffer waist to increase acceleration.

3DPROFILE

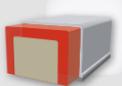

**3D CARBON PROFILE**  
A more consistent ski structure for superior control.

EDGE SUPRA

**SUPRA EDGE**  
Reinforced edges for greater stability.

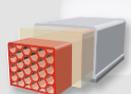

ACTIV'CAP

**ACTIV'CAP**  
Combination of two materials (RossiCap + multidirectional fibreglass).

## 2 INTERNAL CONSTRUCTION

HONEYCOMB

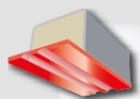

**NOMEX**  
Construction of a honeycomb core for extreme lightness.

WOODAIR

**WOOD AIR**  
Wood construction with air channels.

## 3 SOLES

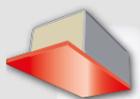

**SKATING DOUBLE GUIDE GROOVE**  
Stabilizes the ski and facilitates tracking whatever its position.

DOUBLEGROOVE

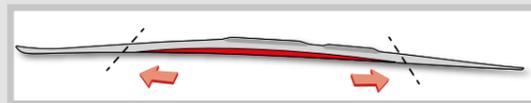

**NUMERIC FINISH**  
This base preparation technology offers a limitless range of ready-to-ski finishes that will improve glide.  
World Cup base finishes for everyone!

NUMERICFINISH

**STONE FINISH**  
Milled base finish.

STONEFINISH

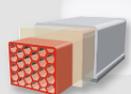

**CENTRAL-EDGE**  
Helps to focus the skier's energy beneath the waist and optimises efficiency and energy transmission.

LOWERTIP

**LOWER TIP**  
Softer and lighter tips and tails for a more balanced ski.

HONEYCOMB

**NOMEX**  
Construction of a honeycomb core for extreme lightness.

AIRTIP

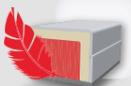

**AIR TIP**  
The AIR TIP base lightens the ski and improves acceleration whether using the double push or alternative technique.

PREMIUM LDC CORE

**LDC PREMIUM CORE**  
A lighter construction, reinforced with basalt fiber.

LDC CORE

**LDC CORE**  
Lighter structure.

**R-SKIN WAXLESS PATTERN**  
The synthetic waxless pattern behaves almost identically to a waxed ski, boasting easy grip on all types of snow and excellent glide performance whatever the conditions.

RSKIN

**AR POSITRACK WAXLESS PATTERN**  
Thermoformed waxless pattern delivering very pleasant glide and excellent grip.

POSITRACK

**AR PLUS WAXLESS PATTERN**  
Cut into the base itself, this AR waxless pattern is the perfect compromise between retention and gliding. Perfect for rental use.

ARPLUS

## 4 SIZES

RACINGCOBRA

**COBRA RACING**  
For extremely stable, fluid skating. Enables the skier to come back into the direction of travel faster at the end of the glide phase.

MEDIUM SIDECUT

**MEDIUM SIDECUT**  
This versatile sidecut enables you to ski both on and off track.

PARALLEL SIDECUT

**PARALLEL SIDECUT**  
A parallel sidecut is especially well suited to track skiing.

SHORTSIZE

**SHORT SKI CONCEPT**  
An exclusive Rossignol concept that guarantees maneuverability. Facilitates acceleration and makes skating movements more dynamic.

WIDE SIDECUT

**WIDE SIDECUT**  
A sidecut that's at ease in all conditions, on all terrain.

## 5 BOOTS CONSTRUCTION

CARBONCHASSIS

**CARBON THERMODUR CHASSIS**  
Sole unit made from a single piece of 100% carbon THERMODUR.  
• Maximised torsional rigidity  
• Optimised front flexion  
• Energy transmission

DUALCORE

**DUAL CORE**  
Injection-molding using different densities of material in the same mold.  
• Precision of movement  
• Prevents energy wastage  
• Optimal contact.

CARBON CUFF

**CARBON CUFF**  
• 100% carbon cuff  
• Optimal power transfer.

THERMO ADJUSTABLE

**THERMO ADJUSTABLE FIT**  
Thermoformable materials are heated so that boot volume can be changed. The boot adapts itself to the foot. Tailor-made!  
• Comfort  
• Precision  
• Feel.

MOBILECUFF

**MOBILE CUFF**  
Optimal freedom of fore/aft movement combined with torsional rigidity for total control.

SOFTTOUCH

**SOFT TOUCH**  
Ultra-comfortable control thanks to the interface membrane.  
• Comfort  
• Control  
• Fit.

ASYMMETRIC STIFFENER

**ASYMMETRIC BACK STIFFENER**  
Stiffener to suit every situation.  
• Arch support  
• Torsional rigidity  
• Well-supported, stable platform.

WOMENLINING

**WOMEN LINING**  
• Soft liner  
• Fleece for warmth and protection  
• Ultimate comfort.

LOWVOLUME

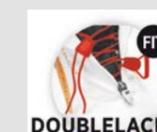

**LOW VOLUME FIT (LVF)**  
A unisex alternative for more slender feet (Low Volume Fit). Personal attention!  
• Easy foot entry and close fit  
• 100% feel  
• Total envelopment of the foot.

TECH CONTROLWRAP

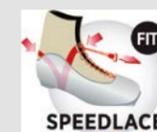

**TECH CONTROL WRAP**  
A light and effective concept that opens up real sensations in Classic together with stability and easier ski control.

## 6 ADJUSTMENT

DOUBLELACING SYSTEM

**DOUBLE LACING SYSTEM**  
A single system provides independent control of mid and forefoot closure for more comfort and precision.

SPEEDLACE LOCK

**SPEEDLACE LOCK**  
Rapid, easy closure for better support of the foot and more precision.

ADJUSTING STRAP

**ADJUSTABLE STRAP**  
For more support and control.

# POLES

Rossignol has developed a very comprehensive range of poles which coordinate ideally with the different ski ranges to provide the perfect solution for all Nordic skiing styles. From shafts to grips, baskets and straps, nothing has been left to chance. Every detail has been studied with painstaking care to ensure the same high level of satisfaction, pleasure and performance for all users, from World Cup racer to beginner.
